

SK INDEX - VOLUME 40

In the following index, which covers Volume 40 - January 2016 through December 2016 of *Skinned Knuckles*, each subject is followed by a series of two numbers separated by a hyphen. The first number, before the hyphen, represents the Issue Number (January is number 1, February number 2, through December number 12). The second number, after the hyphen, is the page number. In the case of a single entry, only one number will appear; in the case of multiple entries, a series of numbers, separated by a comma, will appear. In previous annual indices, each author or contributor was listed by name. We have eliminated the name references in this current index. Additional topics can be found in the Back-Issue Index (in the December issue), or on our website, www.skinnedknuckles.net. The website will include topics in all available issues through volume 40 as well as provide information on how to purchase back issues. Reprints of specific articles are not available, but complete back issues may be purchased, if in stock. Go to www.skinnedknuckles.net and click 'Back Issues'.

An Index of Articles covering each year has been a coveted project of ours, but unfortunately we haven't been able to find anyone willing to go through each issue, from August 1996 to the present and 'build' a detailed index. We do have one from August 1976 through July 1996, but nothing following. If you have time on your hands, are detailed oriented, and feel like getting involved in an interesting and educational project (the job requires reading each article in each issue) why not contact us? We will, of course, supply the issues to you at no charge, and perhaps we can even work out a small payment to you - not much, but perhaps beer money. If it sounds like something you'd be interested in doing, please contact us at Skinned Knuckles, PO Box 6983, Huntington Beach, CA 92615. In the meantime, please review the Back Issues topics beginning on page 45 of this issue for broad topics.

TWO ITEMS OF IMPORTANCE:

In our November 2016 issue we reprinted Carburetor Calibration charts from early Motor's Handbooks. Unfortunately, because of the very small font size, a problem occurred during printing which rendered the text unreadable. We apologize. Upon request, by mail or e-mail, we will replace the illegible pages with clear text on separate sheets of paper. This should solve the problem for you. Again, we apologize.

The second point has to do with the annual Horseless Carriage Club Holiday Motor Excursion. We advised you, in the November issue, that the venue had changed to Santa Anita Park. That information was given to us just prior to going to press. What we hadn't been told - until just recently - is that the entry charge this year will be \$10 and not the \$5 as previously quoted.
